

MultiLog New – SMS logger

INTRODUCTION

Building on the proven capability and features of the MultiLog family, Palmer/Radcom are pleased to introduce a new SMS flow data-logger designed for highly economic logging of network and commercial meters.

The unit is fully compatible with Radwin software, benefiting from its comprehensive range of data analysis and presentation functions, including web-hosted data.

The new design benefits from the latest technology, and housing materials to produce a logger that combines the latest technical capability, in a rugged system.

Features

- Single or dual digital (flow) inputs
- Based on proven MultiLog technology
- Highly Cost - Effective
- Simple Installation and Operation
- Data-compression – saving call charges
- LED Status indication
- 5-Year Battery Life
- SMS – GSM data options

Scope of supply

The System comprises a rugged IP68 logger unit, with glanded input and detachable antenna

This unit provides 5-year battery life with daily reporting of logged data via SMS, together with a single time window for programming.

Options.

An RS232 connector can be added as an option.

The unit can be supplied with one or two digital inputs.
